## Key For Refrigerant Safety Caps

Item No.	Specifications
91605	UNIVERSAL KEY FOR REFRIGERANT LOCKING CAP

## Features:

### Code compliance:

Meets the requirements of IMC and IRC codes.

### Weatherproof:

Has an anodized aluminum casing with threaded brass inserts, which makes them resistant to harsh weather conditions.

### Universal key:

Comes with a universal key that fits locking caps from all major manufacturers.

### Deters theft:

Tamper-resistant design makes it difficult to access the refrigerant. Special tools are required to apply or remove the caps.

### Color-coded:

The caps are embossed and color-coded, which helps prevent accidental mixing of refrigerant gases in A/C systems.

### Safeguards refrigerant:

Proper installation of the caps safeguards against refrigerant leakage, which can be harmful to the environment and human health.
