Features

- · Horizontal Vent Termination Kit.
- Use for water heater horizontal venting.
- Strengthen Polyvinyl Chloride material.
- · Non-Corrosive, Non-Conductive.
- Hide exhausting and intake pipes. Avoid exhausting and intake air mixing.

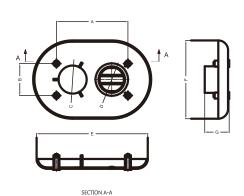

Installation

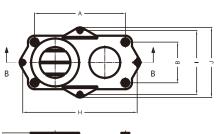

- 1. Refer to the furnace manual for the correct pipe diameter.
- 2. Choose the HVENT kit matching the pipe size.
- 3. Install the air intake and vent on the vent plate.
 - a. Suitable for both direct and non-direct venting.
 - b. Vent should protrude a max of 2 1/4 inches from the vent plate.
 - c. Air intake should not exceed 1 inch from the vent plate.
- 4. Mark air intake, vent, and mounting holes using the vent plate, observing clearances.
- 5. Cut holes for the air intake and vent.
- 6. Drill four 3/16-inch holes and insert plastic anchors.
- 7. Secure the vent plate with the four supplied screws (#8 x 1-inch, pan head stainless steel).
- 8. Secure the vent cap to the plate with the four supplied screws (#8 x 2-inch, pan head stainless steel).
- 9. Inspect the wall for gaps and seal with silicone or an appropriate sealant.

Note: Do Not Use This Kit to Vent Category I, II, or III Furnaces. Do Not Apply to Non-Condensing Furnaces. Do Not Use for Roof Top Venting.
