## RAIN CAP FOR CONCENTRIC VENT KIT

### Submittal Information

Part No. 22157 - 22159

Document No. SPEC22157

Date 2026-01-09

Revision 01

### General Properties

Installation Orientation: Horizontal or Vertical

Material: PVC (Polyvinyl Chloride)

UV Resistance: Suitable for outdoor exposure

Weather Resistance: Resistant to rain, snow, and wind-driven moisture

### Features

- Provides a weather-resistant termination that prevents precipitation and foreign objects from entering the vent system.
- Maintains proper separation and flow paths for concentric intake air and exhaust gases.
- Interfaces directly with compatible concentric vent piping without the need for additional transition fittings.
- Suitable for both horizontal and vertical vent terminations when installed per system design requirements.
- Constructed of rigid PVC to ensure dimensional stability and resistance to corrosion in outdoor environments.

### Installation Notes

- Install per manufacturer instructions and local codes.
- Maintain required clearances.
- Verify compatibility and vent sizing.
- Do not** modify or use with non-approved systems.
